Eclectic Operational Definition of “Knowledge” dan “Knowledge Management (KM)” derived from “Human System Biology-based Knowledge Management (HSBKM) model framework”

Source :

<http://www.km4dev.org/forum/topics/model-framework-by-nature> - “*Model framework by Nature : Human System Biology - based Knowledge Management (HSBKM)*” -we (re)defined Knowledge as follow, **Human Knowledge**, in broad meaning (DI – KW model), is the product of human knowing tools, Knowledge is the output of human knowing tools, evolved as emergent property, having consciousness inside human being as complex system, alive and behaving as subject with freewill, contrary with Data and Information exist outside human being, non-alive and behaving as object only.....

To make it more clarified, <http://bit.ly/mY6gXY> - “*MAKING KNOWLEDGE MANAGEMENT BETTER THROUGH KNOWLEDGEABLE CONCEPT*”, By giving broad meaning the role of KM in nature, therefore **human Knowledge** is the integral part of broad Nature Knowledge (Knowledge of Nature). Knowledge, either Human or Nature Knowledge by nature is dynamic entity continuum characterized as having consciousness element factor (CEF) structure. Human Knowledge and/or Nature Knowledge by nature either within quantum physics level or classical mechanic physics level, differentiated into infinite levels of consciousness,.....

.....**Knowledge Management** (KM) essentially is not management technique but behaving more as a living access mechanisms that can be used across any management tool type such as Total Quality Management, Learning Organization (Peter Senge's Fifth Discipline), HRM, Benchmarking, Process Classification Framework, Business Process Reengineering, Balanced Scorecard, Business Intelligence, Information Management including Social Media platforms etc. wherein each with their specific functions to be orchestrated under KM's consciousness. So, here we put KM in incredibly broad meaning behaving as subject with higher level than any other management tool type which is treated only as object (<http://www.scribd.com/doc/28696847/How-to-re-postulating-the-paradigm-of-Knowledgeand-Knowledge-Management> and/or <http://mobeeknowledge.ning.com/forum/topics/repostulating-the-paradigm-of>).

Impact of HSBKM model framework to Theoretical Physics

PROPRIETARY RIGHTS 	BRIEF DESCRIPTION
1. Human System Biology-based Knowledge Management (HSBKM™) model framework	Our Knowledge Management (KM) model framework derived from human system biology model , in which

http://bit.ly/lx3GbA and http://bit.ly/pKA08U	KM is a comprehensive entity of <i>Technology</i> (KM Tools) analog with human senses, <i>Processes</i> (KM Process Framework) analog with human mind brain and <i>People</i> (KM Standard Culture and Value) analog with human consciousness DNA respectively
2. Mobee Knowledge Competency Capability Maturity (MKCCM™) model http://bit.ly/lx3GbA http://bit.ly/e7HCoM (pp 5-7 and pp 61-64)	MKCCM™ is our KM metrics to complementing the operational concept of HSBKM™ considering that Knowledge is an important living valuable aspect and must be well managed and measured
3. Spatio Temporal Knowledge Management 2.0 Learning Approach http://bit.ly/i8p4kK and http://mobeeknowledge.ning.com/forum/topics/spatio-temporal-learning-1	We put KM education within context of “SpaceTime” dimension or we put the term “Spatio Temporal” approach in order we could give space to possible futuristic unpredictable KM development
4. Knowledge – Value (KV) http://mobeeknowledge.ning.com/forum/topics/imp-act-of-human-system-biology-based-knowledge-management-hsbkm-m , http://mobeeknowledge.ning.com/forum/topics/human-knowledge-to-nature-knowledge-knowledge-consciousness-entit and http://mobeeknowledge.ning.com/forum/topics/fro-m-boson-to-human-knowledge	<p>Derived from HSBKM™ applied to Nature Knowledge continuum and driven by Psycho-Somatic entity paradigm as well as DI – KW* (separated) model concept as widened perspective of Knowledge in broad meaning, we use absolute value scaling ratio ranging from 10^{-38} (<i>Planck number</i>) applied to <i>Known</i> (see : box below) and consequently 5.0 applied to human <i>Knowledge with Higher Consciousness (KHC)</i> or accumulated to KV = 9.0 as human maximum possible score <i>en route</i> to infinity or goes beyond human KV. KV is mean to assessing hypothetically the intensity of Nature Knowledge consciousness element factor within Knowledge (K) continuum in the Universe all at once complementing E (Energy) and M (Matter) of the Universe</p> <p style="text-align: center;">*stands for DataInformation – KnowledgeWisdom</p>
5. Mobee Knowledge Constanta (“k” constant) http://mobeeknowledge.ning.com/forum/topics/imp-act-of-human-system-biology-based-knowledge-management-hsbkm-m	<i>Known</i> (see : box below) as determinant factor of emergent property in complexity within Nature Knowledge continuum generated a constant factor written as “k” functioning as a constant factor ranging from 0.0 – 1.0 applied to Mass – Energy Equivalence or the equation $E = mc^2$ to be written as $E = k mc^2$. K achieved as 1.0 at age of the Universe

	<p>was about 370,000 years after Big Bang where Matter domination reached up to time before the evolution of living – biological system taken place, and then after that “k” positively exist gradually less and less than 1.0 The “k” = 1.0 representing the highest entropy of certain loci in the Universe. Both KV as well as “k” supposed as KM metrics applied to Nature Knowledge and considered as hypothetical metrics</p>
<p>6. Mobee Knowledge Knowon http://www.delicious.com/mobeeknowledge/knowon http://bit.ly/rjJzgb and http://scr.bi/o5p9Av</p>	<p>A hypothetical particle that mediates the force of Knowledge consciousness element in the framework of quantum field theory but independent to SpaceTime (IST) factor causing <i>entanglement</i> effect in quantum mechanics and particle physics. We speculate that Knowon is the candidate of “<i>Psychic (Consciousness) Mediating Particle</i>” of the Universe with noted that <i>Graviton</i>, the counterpart particle, is the “<i>Somato Mediating Particle</i>” of the Universe. The word “Somato” means affecting or characteristic of the Body as opposed to the Psycho or Consciousness. Proposed as fifth fundamental force of Nature, Knowon must be massless (because Knowledge force has unlimited range) and seems do not related with or at least don’t have spin quantum number as the other mediating particles considering that Knowon is IST. The phenomenon of emergent property in complexity of Nature believed as the manifestation of the work by consciousness element of Knowon as “<i>Psychic (Consciousness) Mediating Particle</i>” within their target loci counterparting the work of Graviton as “<i>Somatic Mediating Particle</i>” in shaping SpaceTime, manifested as an entity particle we believe as Higgs Boson, instead of collaboration with other three fundamental forces of nature, strong-weak-electromagnetic forces or <i>Gluon, Photon, and W-Z</i> respectively</p>

Brief overview of our work :

- **Citation :**

.....Our Knowledge Management (KM) – generated Physics constructs discovery, covering the attributes of fifth Fundamental Force, “k” constant ranging 0.0 – 1.0 for $E = k mc^2$ and Knowledge Value (KV) measurement for nature Knowledge continuum of the Universe.....

- **Statement of accomplishment :**

From our **Human System Biology-based Knowledge Management (HSBKM)** model framework as well as our **Mobee Knowledge Competency Capability Maturity (MKCCM)** model as Knowledge Management (KM) metrics which has been used for our KM consultancies since 2009, we treated them with “inverted paradigm method” (“basic science derived from applied science”). The resulting process making us succeeded in developing theoretical constructs derived from KM applied to Physics

Our Theoretical and/or Astro Physics constructs includes the declaring of 4 (four) new basic variables, “**Knowledge**” as fabric of Universe beside Energy and Matter, “**Knowon**” newly proposed as fifth fundamental force of Nature, a hypothetical massless, independent to SpaceTime (IST) particle containing consciousness element factor (CEF) with speed of entanglement functioning as “psychic / consciousness mediating particle” to counterparting Graviton as “somatic mediating particle” to give shape of SpaceTime within psycho-somatic entity paradigm of our (smart) Universe and **a constant factor written as “k”** ranging from 0.0 – 1.0 applied to Mass – Energy Equivalence or the equation $E = mc^2$ to be written as $E = k mc^2$. The “k” = 1.0 representing the highest entropy of certain Knowledge loci in the Universe. Other than that, we also mentioning “**Knowledge Value**” (KV) as an absolute value scaling ratio ranging from 10^{-38} (*Planck number*) applied to *Knowon*, and consecutively KV = 5.0 applied to human *Knowledge with Higher Consciousness (KHC)* or accumulated to KV = 9.0 as human maximum possible score *en route* to infinity or goes beyond human KV. KV is mean to assessing hypothetically the intensity of Nature Knowledge consciousness element factor within Knowledge continuum in the Universe all at once complementing Energy and Matter of the Universe.

The surprising impact of KM applied to Physics will be of great value to scientific evolution.

KNOWLEDGE LOCI IN HUMAN AND NATURE AS INTEGRAL PART OF GRAND DESIGN

HUMAN and NATURE KNOWLEDGE

Derived from *Human System Biology-based Knowledge Management (HSBKM)* model framework concept (Main ref. <http://bit.ly/omLKPv> - “*The study of Human Consciousness : Penrose vs Md Santo*”) as source of psycho–somatic thinking paradigm

<u>1st Human target loci</u>	<u>2nd Human target loci</u>	<u>3rd Human target loci</u>	<u>“Somewhere in Nature” as target loci *</u>
Human Senses (Peripheral Nerves System incl. Autonomic Nerve System) as target of <i>Known</i> acting as Primary Human Knowing Tools (HKT) producing Knowledge with Lower Consciousness (KLC)	Human Brain (Central Nerves System) as target of <i>Known</i> acting as Secondary Human Knowing Tools (HKT) producing Knowledge with Medium Consciousness (KMC)	Human Genomic DNA (DNA Consciousness) as target of <i>Known</i> acting as Tertiary Human Knowing Tools (HKT) producing Knowledge with Higher Consciousness (KHC)	We strongly believed that <i>GWB*</i> as well as <i>CNB*</i> by reasonable assumptions, postulated as “psycho-somatic” main sources (<i>Graviton</i> and <i>Known</i>) going toward target loci in the universe containing “Nature DNA” or “ Knowledge with Nature Consciousness ” (KNC) (see the left three columns applied for human being)

*The best reasonable candidate to explain the existence of “Nature DNA” is **cosmic gravitational wave background (GWB)** as Graviton “carrier” associated with **cosmic neutrino background (CNB)** as *Known* “carrier”. In brief, *GWB* be responsible as “somatic mediating particle” carrier of the universe. *CNB* be responsible as “psychic / consciousness mediating particle” carrier of the universe. *GWB* combined with *CNB* considered as psycho-somatic entity of the Universe.

By their complexity, human being is the most comprehensive psycho-somatic entity creature in the Universe (From *Md Santo, Fundamental Forces of Nature revisited : Introducing Known* (not yet published)
