

# E Agenda Knowledge for Development

## Summary

22 January 2017

## KNOWLEDGE DEVELOPMENT GOALS

### **Goal 1: Pluralistic, diverse and inclusive knowledge societies**

Responsible and transparent knowledge ecosystems, also for those who are excluded because of gender, migration status, disability, and other vulnerabilities.

### **Goal 2: People-focused knowledge societies**

Self-determination of the individual, founded on education for all, freedom of expression, universal access to information and knowledge, and respect for cultural and linguistic diversity.

### **Goal 3: Strengthening local knowledge ecosystems**

Collaboration and context-based communication, based on local realities and local knowledge.

### **Goal 4: Knowledge partnerships**

Partnerships need to cross sectoral and disciplinary boundaries to facilitate creative and rich solutions. Thematic knowledge partnerships and public-partnerships are also important.

### **Goal 5: Knowledge cities and rural-urban linkages**

Cities recognise and embrace their knowledge function so that rural areas can also be part of knowledge societies.

### **Goal 6: Improved knowledge strategies in development organisations**

Internal knowledge management needs to be improved with a recognition of these organisations' role in knowledge ecosystems and in supporting local knowledge.

### **Goal 7: Capture, preservation and democratization of knowledge**

Protection of intellectual heritages, including digital heritage, in libraries, museums and archives.

### **Goal 8: Fair and dynamic knowledge markets**

Public funded knowledge is a global public good, while the private sector also has an important role in supporting local knowledge markets and entrepreneurship.

### **Goal 9: Safety, security and sustainability**

The evolving knowledge society should mitigate uncertainties and negative impacts.

### **Goal 10: Legal knowledge**

Establishing legal frameworks and legal knowledge for safety and security.

### **Goal 11: Improved knowledge competencies and knowledge work**

Knowledge work plays an important role in cultivating knowledge and supporting unprejudiced interaction with alternative knowledges. Knowledge competencies require continued development and should be more widespread.

### **Goal 12: Institutions of higher education to play an active role**

Universities and other institutions of higher education must develop new, inclusive models to solve real world problems.

### **Goal 13: Information and communication technologies (ICTs) for all**

ICTs should be utilized to provide access to knowledge and facilitate communication and dialogue without hampering alternative or traditional methods of knowledge transmission.
